

PUGET SOUND LEGISLATIVE UPDATE

March 6, 2014 | Week 8

The Puget Sound Legislative Update highlights the issues related to our region's work to protect and restore the health of Puget Sound, Washington's greatest natural asset.

There are 7 days left in the 2014 session. Legislators are working hard to pass bills that survived the recent cutoffs and negotiate a final Supplemental Budget for the second half of the biennium.

Hot Topics

This week, the House passed their budget and there was an informative work session in the House Environment Committee about climate change and the value of ecosystem services.

Tomorrow at 8:00 a.m. there is a Public Hearing on [SB 6157](#) regarding a hazardous substance tax exemption in the House Finance Committee. Friday also marks the last day for each chamber to pass each other's bills, except budgets and matters necessary to implement budgets. Legislators are expected to work late into the evening.

Next Thursday, March 13, is the last scheduled day of session. That same day, the House Environment Committee will also convene a work session on forage fish populations as an indicator to Puget Sound recovery. Representatives from the Puget Sound Institute, Northwest Straits Commission, and Sound Action will make a presentation on this important topic.

The Legislature is scheduled to adjourn on time. There appears to be no need for a special session and all eyes are on adopting a final budget.

Budget Update

The Senate and House have both passed their versions of the Supplemental Operating Budgets. Both proposals are modest and increase spending for the remainder of the biennium by less than \$200 million. It's important to remember these are mid-biennium budgets, and few changes are anticipated in the state's \$33 billion, two-year operating budget. The Capital Budgets from both chambers have also been adopted.

2014 LEGISLATIVE SESSION

- The 2014 Legislative Session is scheduled from Jan. 13 to March 13.
- Puget Sound Legislative Updates are posted at: http://www.psp.wa.gov/legislative_updates.php
- For up-to-date Legislative information, visit: www.leg.wa.gov
- Watch or listen to hearings and work sessions on: www.tvw.org
- Board members can participate in weekly coordination calls about issues in Olympia every Friday from 11:30 to Noon.
- Connect with PSP for breaking news and other events affecting Puget Sound on Twitter @PSPPartnership and Facebook: www.facebook.com/PugetSoundPartnership

Communication & Coordination

If you would like to meet with legislators or testify on a bill, please contact me to let us know how we can help:

Michael Grayum

State and Local Government
Relations Director, 360-628-1907

The House and Senate Operating Budgets did not include funding for Local Government Planning support to the Department of Commerce, which is proposed in the Governor's budget. The funding would provide essential financial and technical assistance to cities and counties to keep their comprehensive plans updated and compliant with the Growth Management Act. Funding was also not included for the State Conservation Commission to help landowners, farmers, and ranchers develop and implement dairy and livestock management plans. Both of these priorities are important to advance Puget Sound recovery.

Next, both chambers will meet with the Governor's Office to begin negotiating a compromise proposal and final budget by the end of session. We continue to emphasize the importance of investments requested by our partners that the Partnership ranked and prioritized as needed to implement the Puget Sound Action Agenda.

Puget Sound Funding

The table below highlights the differences in Puget Sound investments for the Senate, House, and the Governor's proposed budgets. There is general alignment on funding for the Water Pollution Control Revolving Program, culvert removal, and preventing oil spill risk by rail and vessels.

Additionally, here is a [letter to legislative leaders](https://app.box.com/s/5sum4wbv5fuog4l2nqn9) from the Chair of the Leadership Council recommending investments by the House and Senate to advance Puget Sound recovery in the final 2014 Supplemental Budget. You can read it at: <https://app.box.com/s/5sum4wbv5fuog4l2nqn9>

Operating Budget

Issue	Recipient	Senate	House	Governor
Managing and preventing invasive species	Dept. of Fish & Wildlife	\$505,000		
Ongoing funding to reduce oil spill risk rail/vessel	Dept. of Ecology	\$652,000 (ongoing)	\$652,000 (one-time)	\$652,000
Ensuring compliance with product laws	Dept. of Ecology		\$611,000	\$611,000
Expanding toxic cleanup capacity	Dept. of Ecology	\$1.4 million		\$1.4 million
Ocean acidification monitoring	Dept. of Natural Resources	\$422,000		
Improving efficiency of regional watershed organizations	Puget Sound Partnership	\$71,000		

Capital Budget

Issue	Recipient	Senate	House	Governor
Voluntary Stewardship Program	Conservation Commission	\$7 million		
Remedial action grants	Dept. of Ecology	\$21.7 million	\$21.3 million	\$9 million
Cleanup Puget Sound toxic sites	Dept. of Ecology	\$17.9 million	\$15.4 million	\$15.4 million
Public Works Trust Fund Pre-Construction Loans	Dept. of Commerce			\$10 million
Flood hazard reduction grants	Dept. of Ecology	\$15 million	\$25 million	
Clean Water Act mitigation	Dept. of Ecology		\$25 million	
DNR culvert replacement	Dept. of Natural Resources	\$3.3 million		NA

Federal Budget Update

President Obama's budget for 2015 provides \$25 million for the EPA's Puget Sound geographic program. The most money ever requested previously for Puget Sound in a President's budget was \$20 million. Strong investments by the state are a great way to show our federal representatives and agencies what is important at the local level. Thank you to everyone working to make Puget Sound recovery a priority. The legacy we leave future generations depends on the work you all are doing today.

Puget Sound Priorities

Public Works—E2SHB 1484, also sponsored by Rep. Stanford, passed the House Feb. 18 by a vote of 92-5. The bill is currently in the Rules Committee where it must advance for a vote by the full Senate before going to the Governor's desk for signature and final approval. This legislation would improve policies guiding the Public

Works Board and would help ensure that projects are consistent with the Puget Sound Action Agenda. The Partnership supports this legislation.

Additionally, SHB 2244, sponsored by Rep. Stanford, passed the House by a vote of 87-11 but was not scheduled for a public hearing in the Senate Ways & Means Committee. This bill would have restored tax resources to the Public Works Assistance Account beginning July 1, 2015, which the Legislature transferred to the State General Fund and the Education Legacy Trust Account through June 30, 2019. This will be an important priority for Puget Sound partners to advance in the next legislative session.

Preventing Invasive Species—ESSB 6040, sponsored by Sen. Honeyford, is with the House Rules Committee for a second reading. The amended bill eliminates the funding mechanism that was originally included, which is very unfortunate. The next steps for the bill are to move out of the Rules Committee and then be voted on by the full House. Fortunately, the bill is widely supported for its policy agenda. It would reorganize, amend, and expand the prevention and integrated management of aquatic invasive species. It would establish a framework of check stations inspections, inspections, and decontamination of portable aquatic equipment that could potentially harbor invasive species. Unfortunately, there is no funding mechanism in the current bill and we urge the House to adopt the Senate’s version.

Fish Passage Barriers—2SHB 2251, sponsored by Rep. Wilcox, passed the House by a unanimous vote and is currently in the Senate Rules Committee awaiting a vote by the full Senate before going to the Governor’s desk for signature and final approval. The Partnership supports this bill because the removal of fish passage barriers is imperative to Puget Sound recovery. We appreciate the many partners who are working together to advance this legislation and urge the Legislature’s continued support.

Maritime & Manufacturing Economic Resilience—SHB 2580, sponsored by Rep. Tarleton, passed the House by a 93-4 vote and passed the Senate unanimously. The bill was amended to simply direct the Legislature to form an advisory committee of stakeholders to provide technical information and assistance. Although significantly watered down, the legislation still garners the support of the Partnership, as well as the maritime and manufacturing industries in our state.

Funding Flood Hazard Reduction and Stormwater Projects—HB 2357, sponsored by Rep. DeBolt, still has not been brought to the House for floor adoption, but might be considered a bill that is necessary to implement the budget. The bill would provide \$1.515 billion of capital funding over 10 years for a combination of flood hazard reductions and stormwater projects. These bonds could require a public vote for the legislation to pass. Additionally, SSB 6516, sponsored by Sen. Honeyford, would create a joint legislative task force to study necessary financing options for water supply, flood control, and stormwater projects statewide. The bill passed the Senate 45-2 and is scheduled for executive session in the House Capital Budget Committee on March 10 at 8 a.m. The bill received bipartisan support in committee and several business and environmental community partners testified in favor of this collaborative approach.

Derelict and Abandoned Vessels—2SHB 2457 passed the House by a vote of 88-9 and is now awaiting a second reading in the House Rules Committee. The language in the substitute bill replaces the fee on commercial moorage with a less onerous per-foot fee, which increases funding from approximately \$400,000 to \$700,000. The Partnership continues to support this legislation, understanding there is still some concern from our partners at the Ports about the bill's secondary liability section, which continues to be revised.

Recycling of oil—ESB 6501, sponsored by Sen. Ericksen, passed the Senate by a 46-1 vote and passed the House on March 5 by unanimous vote. It now goes to the Governor's desk for final approval. This legislation strengthens oil-recycling programs by requiring Ecology to include best management practices for preventing and managing PCB contamination in the agency's guidance to local governments for used oil collection sites and used oil-recycling programs. The bill also requires local governments to include a plan that uses best management practices and authorizes local governments to apply to Ecology for reimbursement of extraordinary disposal costs, as well as costs associated with complying with EPA enforcement-related agreements. The Partnership supports this legislation.

Maritime & Manufacturing Economic Resilience—SHB 2580, sponsored by Rep. Tarleton, passed the House by a 93-4 vote and passed the Senate on March 4 by a unanimous vote. The bill was amended to simply direct the Legislature to form an advisory committee of stakeholders to provide technical information and assistance. It must now go back to the House for a concurrence vote. Although significantly watered down, the legislation still garners the support of the Partnership, as well as the maritime and manufacturing industries in our state.

Oil Transport—HB 2347, sponsored by Rep. Farrell, passed the House by a 57-37 vote and died in the Senate. SB 6524, sponsored by Sen. Ericksen, also failed to pass the Senate. The loss of both these bills is unfortunate. However, the debate on oil spill prevention continues with new legislation, SB 6576, recently introduced and sponsored by Sen. McCoy and Sen. Rolfes. The bill was referred to the Senate Energy, Environment & Telecommunications Committee and was not scheduled for a public hearing. Negotiations continue between the House, Senate, environmentalists, and the industry.

The latest bill would require the Department of Ecology to post to the agency's website the quarterly reports submitted by oil refineries and certain oil storage, handling, and transfer facilities about their weekly arrivals and departures of oil. Required information would include the following: number of tank vessels and rail that transferred or delivered oil at the facility each week, volume and type of oil, and route taken by oil railcars arriving at the facility. The bill also requires Washington State University (WSU), in consultation with Ecology and the Military Department, to conduct a study of the state's preparedness and capacity to recover from an accident involving railcars transporting oil. The report would be due to the Legislature by Dec. 1, 2014.
